

Requirements

Bailey Crawford

Python Version

Python 3.11 is recommended. The project was tested on Windows 10/11, but it should also run on macOS or Linux with the same dependencies installed.

Required Libraries

- pandas
- numpy
- tensorflow / keras
- scikit-learn
- scipy
- matplotlib

Installation

Install dependencies using:

```
pip install -r requirements.txt
```

Alternatively:

```
pip install pandas numpy tensorflow scikit-learn scipy matplotlib
```

Project Files

- fairness_tool.py – proposed improved method
- lab4.py – baseline implementation
- plot_graph.py – graph generation
- requirements.txt – dependency list
- model/processed_kdd.csv – dataset
- model/model_processed_kdd.h5 – trained model

Notes

- TensorFlow may display CPU/GPU warnings; these do not affect execution.
- Results may vary slightly due to floating-point differences.
- Fixed seeds are used for reproducibility.
